    (Mobile Specific - Toogle to "Hide Members")
11.1.1 Remove Member Confirm Dialog
    ("Remove Member" Subroutine to remove member from Chosen list, then link to 11.0)

*The Group Builder shows online waiting list members and allows the user to refine those members based on critera they select. The behavior of the page flows in the following steps:
1. Group Leader
    - Based on their MyBSF records
    - Gender, Langauge, and timezone (dirived from location)
2. Choose a Day and Time
    - Based on the timezone, the number waiting list members that fit the chosen Gender and Language are shown for each daypart.
    - The user now selects a single daypart, the selection is highlighted and the dataset is refined to that daypart.
3. Select a start time
    - Within the daypart chosen, start times are listed for each hour of that daypart with the number of members in the refined dataset that are avilable for that hour in paranthesis (note that the person on the waiting list must be avilable for that entire hour)
    - the user selects a start time and that slection is highlighted, and the dataset is further refined
4 Select Members
    - Members in the refined dataset are now shown, and the user can select multiple members to create their "chosen list" by clicking on check circle icon to the left of the members name.
    - User can change sorting of the refined dataset (Sort by name, age, days registered, language, or location)
    - User can further refine dataset by:
    - Seaching for a specific member name (live search)
    - Selecting "Refine" and presented with further refinement options including entering an age range, country, or toggling interests (tags)
    -

12 Suggest Groups

12.0 Leader, Avilability & Language
    (IF non-GL access, they can change leader drop down to any OLG)
12.1 Suggested Group Results
    (Subroutine Black Box finds potential groups based on Leader GTL)
    (IF no group results skip to 12.5)
    ("Details" toogle viewing of group state in 12.2)
    ("Choose Group" link to 12.3)

    ("Group Builder link to 11.0)
12.6 Next Steps Waiting List
    ("Training" link to future training)
    ("View Status" link to 10.1)

Notes

Online Group Builder is a module for MyBSF. The heading and paragraph styles may differ from the current MyBSF implementation.

"Black Box" is a subroutine that finds potential groups based on member waiting list avilability. Logic for this subroutine is in a seperate document.

Training content is currently to be determined.
